

HIMANSHU VISHWAKARMA

Full-Stack Web Developer

hvwishwakarma821@gmail.com | +91 7080987084 | 123 Thesil road, Gandhi nagar, Sidhauri, Sitapur

EXPERIENCE

Velocity Software Solutions Pvt. Lmt. | **Software Engineer** Noida, India | February 2024 - March 2026

- Full Stack Developer with 2 years of experience in eCommerce development using Remix, React.js, Next.js, PHP, JavaScript, HTML, CSS, and SQL.
- Developed Shopify Remix applications and custom modules for OpenCart and PrestaShop, including third-party integrations and API enhancements for improved scalability.
- Worked on database management and responsive UI development, while collaborating with clients for requirements, customization, and technical support.

SKILLS

Programming Languages:	Javascript, Python, Java, PHP
Libraries/Frameworks:	React, NextJS, Node.js, Flask, Pandas
Tools / Platforms:	Git, Prestashop, SQL Server, Linux, Docker, Kubernetes
Databases:	MongoDB, SQL

PROJECTS / OPEN-SOURCE

Okuru

NextJS, TypeScript

- Developed the frontend for Admin and Partner portals of a digital gift card platform where partners can create and manage gift cards that consumers can purchase to gift or redeem in-store.
- Implemented key admin features including country and currency configuration, affiliate & referral settings with redemption limits, and a discount code system for purchases.
- Built a role-based access control (RBAC) system allowing Super Admins to create groups with permissions (view, create, update, delete) and assign them to admin users.
- Developed using Next.js and TypeScript, with Firebase authentication to ensure a secure and scalable management interface.

Knowband

PHP, HTML, JavaScript, CSS

- Developed and enhanced multiple e-commerce modules for OpenCart and PrestaShop, improving store functionality and customer conversion.
- Built marketplace integrations for eBay, Etsy, and Google Shopping, and developed modules such as Store Locator, Affiliate & Referral Program, Shipping Timer, Supercheckout and Automatic Related Products.
- Implemented AI-based tools including a Content Generator, LLM TXT Generator, and chatbot using Qdrant vector database, built with PHP (MVC), HTML, CSS, and JavaScript, along with providing technical support and customization.

Fit-Init | Smart AI Self-Defence & Yoga Trainer

Python, Flask

- Developed a full-stack AI-driven wellness platform using Flask, MediaPipe, and TensorFlow Hub to provide real-time pose correction for self-defence and yoga
- Implemented complex Computer Vision logic to perform live joint-angle analysis, achieving a 90-95 percent accuracy rate in detecting and correcting posture.
- backend performance by establishing a real-time REST API for live accuracy tracking and performance telemetry.

EDUCATION

KIET Group of Institutions

Computer Science and Engineering Bachelors
CGPA: 8.14

Ghaziabad, India
December 2020 - June 2024
